Deliver every time with
Fusion Capture

Typically, warehouse management systems are standalone products, but with **extensive** and **complex** functionalities, our customers were looking for a **low cost** and **easy to implement solution** tailored to the needs of their business.

Designed exclusively for Sage X3, Datel's Fusion Capture is a flexible barcoding and warehouse management system, which provides seamless warehouse integration, live data access and complete user control.

Fusion Capture is the perfect solution for every part of your warehouse:

- ▶ **Goods receipt** - Fusion Capture allows you to immediately confirm a receipt against a purchase in Sage X3 with purchase order and capture key information
- ▶ **Putaways** - Once the stock is received, Fusion Capture's comprehensive stock-location capabilities provides you with extensive control and oversight of stock location
- ▶ **Inter-site transfers** - For multi-site operations, you can use Fusion Capture to facilitate stock movement between locations using handheld scanners with instant visibility of movements
- ▶ **Miscellaneous issues and receipts** - Where stock needs to be receipted without a purchase order or issued without a specific transaction, Fusion Capture can track stock and maintain a representative record of physical warehouse usings its scanner-based options
- ▶ **Sales order picking** - Integrated with Sage X3's distribution capabilities, Fusion Capture allows you to configure and despatch operation to fulfill every requirement
- ▶ **Replenishments** - Integration with Sage ensures that stock-movement information is updated in real-time, to guide warehouse operatives in locating stock for replenishment
- ▶ **Enquiries** - Fusion Capture provides several enquiry options to enable you to quickly locate stock by criteria such as product code, box number of location in real-time
- ▶ **Labelling** - Label production is a key component of ensuring stock visibility and traceability. Fusion Capture supports the production of custom and business specific label formats

There are a number of benefits your business can gain from implementing Fusion Capture:

- ▶ **Low risk and faster implementation** - Fusion Capture can help to evolve your warehouse capabilities as your business grows. Product and process introduction can be implemented in manageable steps, leading to faster and lower risk implementation
- ▶ **Seamless warehouse integration** - Once the stock is received, Fusion Capture's comprehensive stock-location capabilities provides you with extensive control and oversight of stock location
- ▶ **Live data access** - For multi-site operations, you can use Fusion Capture to facilitate stock movement between locations using handheld scanners with instant visibility of movements
- ▶ **Mounted and mobile warehouse management** - Where stock needs to be receipted without a purchase order or issued without a specific transaction, Fusion Capture can track stock and maintain a representative record of physical warehouse usings its scanner-based options
- ▶ **Lower cost of ownership** - Integrated with Sage X3's distribution capabilities, Fusion Capture allows you to configure and despatch operation to fulfill every requirement
- ▶ **Flexibility** - Integration with Sage ensures that stock-movement information is updated in real-time, to guide warehouse operatives in locating stock for replenishment
